

Senior Full Stack Developer

About the Role:

We are looking for an experienced Full Stack Developer to join our growing team. The ideal candidate will have strong experience with both frontend and backend technologies and be comfortable working in an Agile environment.

Required Skills:

- Proficient in JavaScript, TypeScript, and React
- Experience with Node.js and Express
- Knowledge of SQL and NoSQL databases (PostgreSQL, MongoDB)
- Familiarity with AWS or other cloud platforms
- Experience with Docker and containerization
- Strong understanding of Git and version control
- Experience with CI/CD pipelines
- Knowledge of RESTful APIs and GraphQL
- Agile development experience
- Strong problem-solving skills and attention to detail

Nice to Have:

- Experience with Python and Django/Flask
- Knowledge of Kubernetes
- Experience with microservices architecture
- Understanding of serverless computing
- Experience with test-driven development
- Knowledge of security best practices

Responsibilities:

- Develop and maintain web applications using React and Node.js

- Design and implement RESTful APIs and GraphQL endpoints
- Work with databases to store and retrieve data efficiently
- Collaborate with the team in an Agile environment
- Participate in code reviews and maintain code quality
- Troubleshoot and debug applications
- Stay up-to-date with emerging trends and technologies
